Numeric citation fixture

a numbered bibliography and the parenthesised citation shapes

Prior work established the baseline method (12).

Related approaches extend that method (3–5).

Two independent studies agree on this point (7, 9).

A mixed group cites a span and one more work (3–5, 9).

The dataset was released to the public (2020).

The balance condition is stated below.

$$x + y = z \tag{3}$$

The function f(3) is evaluated in the appendix.

(1) First enumerated item, written as running prose.

(2) Second enumerated item of the same list.

Figure 3(b) shows the pipeline for a single run.

Section 4 describes the setup in detail.

A later work is discussed elsewhere (25).

The page ends before the bibliography begins.
